

Wallingford Energy Conservation Commission
April 25, 2011 at 7:00 p.m.
Town Hall Room #116
45 South Main Street, Wallingford, CT

Agenda

Meeting commenced at 7:05 PM. The commission discussed the March 8th meeting with the mayor and actions we should take based on his reactions. The fact that he is planning to hold energy audits of town buildings is encouraging but we noticed that he was not aware of all our activities. Mary is developing report to improve this situation. Ben will follow up with mayor's office for the date and time of energy audits and request that our members can be present. John will contact Joel Rinebold to see if his offer of free energy audits is still available.

Sharon reported that the library is willing to work with us but we should get reports and other projects completed before pursuing those options. It was also suggested that we could present something at Celebrate Wallingford, possibly with PUC.

Bill reported that the teachers are booked for this year but will ask again in summer about getting Alliance for Climate Education to present for students.

Ben needs to gather information for BigBelly Solar Return On Investment form. Should also contact a town where these are being used currently.

Commission discussed ways to save energy in the water and sewer divisions. Suggested contacting Roger Dann to see what measures, if any, are being implemented and suggest some that Trumbull has done.

Meeting was adjourned at 8:33PM
