

Wallingford Energy Conservation Commission
July 26, 2010 at 7:00 p.m.
Benches in front of Town Hall
45 South Main Street, Wallingford, CT

Attendees: Sharon Mooney, John Lynch, Bill Pursell, Ben Martin

Commission arrived at Town Hall to find the doors locked. Decided to meet outside due to nice weather. Sharon informed us of projects neighboring towns were undertaking through corresponding groups:

Meriden was installing a solar/hydro system from Proton Energy

Cheshire was doing upgrades on town buildings through PowerPoint Energy

Also discussed the need for an long term overall town plan for energy conservation. Ben volunteered to create a draft with Chris Smith's help. Sharon will be contacting CMEEC about the incentive programs they have to offer. John will be researching data about gas and oil consumption by the town buildings. Bill will be collating town building electric use data received from the PUC.
